Strategic Planning Survey Results

This memo accompanies the presentation of the 2017 Strategic Planning Survey Results. The Strategic Planning Survey was conducted in the fall 2017 semester as part of a mid-cycle evaluation of progress on the University's [2015-2020 Strategic Plan](#) and our planning processes. Faculty, staff, administrators, and members of Student Government were invited to respond to the online survey. I want to thank those who took the time to complete the survey; we received responses from 188 (11%) individuals.

Overall highlights of the results include:

The majority of respondents are familiar with the University's Mission and Strategic Plan, and feel they are closely aligned.

The majority also believe that strategic planning does impact broad decision-making and resource allocation at the University; they were less likely to indicate that planning impacts resource decisions in their college, division, or department.

Most respondents, over half, also indicated that the majority of the respondents are familiar with the plan — Engaged, Integrated, Global — however, about one-third of respondents they “don't know” about progress on each of these themes. They were least likely to indicate there was opportunity or progress on the theme of the Plan.

In thinking about the plan's specific goals, respondents feel that progress has been made on topics like student service and community-based learning and development, assessment, assurance of student learning, and

globalization in teaching and learning, and cross-disciplinary learning opportunities.

Respondents selected “affordability” as a topic that we should continue to prioritize in the remaining years of the current plan and in future planning activities, along with creation of new academic programs, keeping the Jesuit ideals and mission, and becoming more diverse and inclusive.

The results of this survey were presented to the University Planning Committee at its February meeting and have been shared with the Self Study Working Groups for inclusion in their analyses. I am pleased to share them with you for our continued reflection on progress with our plan and planning process.

Issues Important to Explore through Planning Activities

- Remaining affordable, accessible (87%)
- Devoting resources to Student Success, Completion (54%)
- Monitoring Student Success, Completion, and Outcomes (53%)
- Changing Demographics of Students (53%)
- Seeking to be More Diverse and Inclusive (48%)
- Partnering with Other Colleges, Universities (33%)
- Changing Public Perceptions about the Value of College (33%)
- Increased Expectations and Use of Technology (32%)
- Alternative Types of Programming, such as credentials (30%)
- Opportunities to Re-think Learning, Working Spaces (27%)
- Increasing Internationalization (18%)

Themes from Open-ended Questions

- Issues planning should address in the future:
 - o Creation of new, innovative academic programs based on market demands; also eliminating obsolete programs
 - o Keep Jesuit faith, ideals, mission at the forefront of all we do including decisionmaking
 - o Become more diverse, inclusive for students faculty, and staff; address changing demographics
 - o Tuition costcontainment, affordability and accessibility

Themes from Open-ended Questions

- General comments on strategic plan, planning processes:
 - o Concerns with Global emphasis of the plan seems aspirational, is it realistic?
 - o Better communications of the plan and its outcomes presented by leadership
 - o Strategic planning is meaningful and necessary; we are doing a good job

Next Steps

Improvements & Priorities

- What parts of our process does this data suggest we might improve?
- What goals, objectives in the plan does this data suggest we might focus on?
